

E-learning and International Project Management

03.2017

1. E-learning as an International Project

An E-learning course is a real **International Project** which needs to be **managed**

International:

- Putting together people from different countries (different time zones)
- Different backgrounds (cultures, habits, languages)

Project:

- Activity (learning process)
- Beginning and End (Start and End)
- Particular Purpose (Knowledge or/and skills to acquire)
- Limited resources (

Two projects into one: Training project (Course) and software project (online platform)

Management

From point of view of Trainer

From point of view of each Trainee

2. E-learning as a tool to learn PM

Is E-learning an efficient tool to learn PM?

- Aim of PM: Knowledge and Skills to acquire
- Organisation of the course and the features of the platform play a crucial role

Experience in using Global Campus platform

- News
- Calendar
- Modules
- Communications
- Networking
